WEEK IN REVIEW: This week I finished the site maps for mobile and web for the Marina. I have also got some of the Mobile comp done. I would like to make a trip to the Marina so that I can add some pictures to the mobile comp. I also finished the Code Academy SQL Course.

REFLECT AND CONNECT: My efforts this week have progressed my knowledge in design and SQL. I feel that I performed well, although I wish I could have gotten more of the mobile comp finished. Next week I hope to be able to complete the mobile comp and start trying to put my code into an actual web page.
